

# Planet Labs Lacks Multi-Medium Composition Substrate

by [Nick Clark](#) | Published April 25, 2026

## Planet Reality

Planet Labs operates Dove and SkySat satellite constellations producing daily-revisit optical imagery deployed across defense, agriculture, environmental, and emerging commercial customers.

## Multi-Medium Substrate

Planet's optical observations integrate as credentialed modality; cross-modality composition with RF, SAR, ground-sensors produces multi-medium awareness.

## Planet Position

Planet gains multi-medium composition substrate above optical-only product.
