

# EU eIDAS 2.0 and European Digital Identity Wallet

by [Nick Clark](#) | Published April 25, 2026

## eIDAS 2.0 Reality

EU eIDAS 2.0 establishes the regulatory framework for European Digital Identity Wallet with mandatory cross-member-state interoperability and emerging commercial-sector use cases.

## Mandatory Interoperability

eIDAS 2.0 imposes structural cross-member-state interoperability requirements with emerging mandatory deployment timelines.

## Governance-Chain Substrate

EUDI Wallet operations operate through architectural governance-chain primitive; cross-member-state operations admit through declared federation.

## EU Position

EU eIDAS 2.0 ecosystem gains architectural composition substrate.
