

EHang Autonomous Aerial Vehicle

by [Nick Clark](#) | Published April 25, 2026

EHang Reality

EHang operates EH216-S autonomous eVTOL with China CAAC type certification (first-globally for autonomous eVTOL) and emerging commercial deployment.

Pioneer Certification

EHang's CAAC certification establishes autonomous-eVTOL certification precedent that requires architectural defensibility.

Architectural Substrate

Stage-gated commitment supports autonomous flight phases; remote-operator authority composes through declared admissibility.

EHang Position

EHang gains autonomous-aviation architectural substrate aligned with regulatory pioneer position.
