

General Motors Super Cruise and Ultra Cruise

by [Nick Clark](#) | Published April 25, 2026

Super Cruise Reality

GM Super Cruise operates hands-free L2+ driving across mapped U.S. highway corridors with substantial deployment across GM's premium and emerging mainstream vehicle lines. Ultra Cruise emerging for expanded ODD.

L2+ to L3+ Trajectory

GM's announced trajectory toward L3+ requires structural architectural substrate for emerging certification engagement.

Architectural Fit

Stage-gated commitment maps to L2+/L3 transitions; reversibility-aware admissibility maps to hands-free-to-takeover handoff.

GM Position

GM gains architectural substrate ahead of L3 regulatory engagement.
