

Joby Aviation eVTOL

by [Nick Clark](#) | Published April 25, 2026

Joby Reality

Joby Aviation operates eVTOL development with FAA certification engagement (planned 2025-2026 commercial deployment) and Toyota manufacturing partnership.

FAA Certification Trajectory

Joby's FAA certification engagement requires structural support for phase-decomposed certification approach.

Architectural Fit

Stage-gated commitment maps to flight-phase decomposition; composite admissibility maps to multi-authority aviation reality (operator, ATC, FAA).

Joby Position

Joby gains FAA-aligned architectural substrate.
