

Universal Robots Collaborative Robots

by [Nick Clark](#) | Published April 25, 2026

UR Reality

Universal Robots operates UR3, UR5, UR10, UR16, UR20, and emerging product lines with substantial global deployment across small-and-medium and emerging large-enterprise customers.

Architectural Fit

Stage-gated commitment supports ISO/TS 15066 collaborative-mode decomposition; emerging EU AI Act provisions integrate through declared admissibility.

UR Position

Universal Robots gains architectural substrate.
