

# W3C Decentralized Identifiers (DIDs)

by [Nick Clark](#) | Published April 25, 2026

## DIDs Reality

W3C DIDs operate as recommended identity standard with substantial emerging deployment across self-sovereign identity (SSI), enterprise identity, and emerging IoT-identity applications.

## Keyless-Identity Composition

DIDs provide identifier substrate; keyless-identity provides credential-management substrate; the layers compose structurally.

## W3C DID Ecosystem Position

DID ecosystem gains architectural composition direction.
