

AutoStore Cube-Storage Warehouse Robotics

by [Nick Clark](#) | Published April 25, 2026

AutoStore Reality

AutoStore operates cube-storage automated storage and retrieval systems across thousands of customer deployments globally with major retail, e-commerce, and 3PL customers.

Marker Substrate

AutoStore robot operations integrate as credentialed mesh participants; cross-customer composition operates through declared federation; warehouse-specific marker integration extends substrate.

AutoStore Position

AutoStore gains architectural composition substrate for emerging multi-warehouse and multi-customer operations.
