

u-blox GNSS Modules Lack Cooperative Multi-Modality Composition

by [Nick Clark](#) | Published April 25, 2026

u-blox Reality

u-blox operates GNSS modules deployed across automotive (NEO, ZED), industrial (LARA, SARA), and IoT applications. Technical execution at deployment scale is mature.

Cooperative Composition

u-blox modules contribute as credentialed positioning modality; cross-modality composition adds resilience and emerging-application support.

u-blox Position

u-blox gains cooperative-positioning product roadmap.
