

Adva Oscilloquartz Timing Lacks Master-Less Consensus

by [Nick Clark](#) | Published April 25, 2026

Oscilloquartz Reality

Adva Oscilloquartz operates atomic-clock and PTP timing products deployed across major telecom operators globally.

Master-Less Composition

Oscilloquartz hardware contributes credentialed time observations; master-less consensus operates without master-election overhead.

Adva Position

Adva gains structural-resilience timing substrate.
