

# White Rabbit (CERN) Sub-Nanosecond Timing Lacks Architectural Composition

by [Nick Clark](#) | Published April 25, 2026

## White Rabbit Reality

White Rabbit operates as open-source sub-nanosecond timing protocol deployed across CERN, particle accelerators, and emerging financial/defense applications.

## Composition Substrate

White Rabbit hardware contributes as credentialed sub-nanosecond modality; mesh-time consensus composes White Rabbit with other modalities.

## White Rabbit Ecosystem Position

The White Rabbit community gains architectural composition direction.
