

# ServiceNow Lacks Architectural N-Party Coordination Substrate

by [Nick Clark](#) | Published April 25, 2026

## ServiceNow Reality

ServiceNow operates as dominant commercial workflow platform across enterprise IT, HR, and emerging cross-organization use cases.

## Multi-Party Substrate

Cross-organization workflow operates through architectural multi-party primitives; cross-platform composition admits through declared federation.

## ServiceNow Position

ServiceNow gains cross-organization workflow architectural substrate.
