

# **AWS Bedrock Lacks Architectural Adaptation Governance**

by [Nick Clark](#) | Published April 25, 2026

## **Bedrock Reality**

AWS Bedrock operates managed-LLM platform supporting Claude, Llama, Titan, and emerging models across AWS customers.

## **Adaptation Substrate**

LLM customization operates as credentialed adaptation events; cross-jurisdiction operations admit through declared federation.

## **AWS Position**

AWS gains adaptation-governance substrate above Bedrock.
