

Helium IoT Network and Mobile

by [Nick Clark](#) | Published April 25, 2026

Helium Reality

Helium operates DePIN wireless networks with substantial deployment across IoT (Helium IoT) and emerging 5G (Helium Mobile) sub-networks.

Mesh Substrate

Helium hot-spots contribute as credentialed mesh participants; cross-network composition operates through declared federation.

Helium Position

Helium gains architectural mesh substrate above DePIN-specific tokenomics.
