

Raytheon RTX Defense Mesh Programs

by [Nick Clark](#) | Published April 25, 2026

RTX Reality

RTX integrates Raytheon, Collins Aerospace, and Pratt & Whitney across defense and aerospace. Cross-business and cross-program composition is implementation-by-implementation.

Mesh Composition

Each program contributes credentialed observations; cross-program operations admit through declared federation; cross-coalition operations admit through declared coalition federation.

Competitive Position

RTX gains cross-program architectural alignment. JADC2-class ambitions gain structural support.
